AVCS

ADMIRALTY
Vector Chart Service

This is to certify that PETREL S

is a licensed user of the

ADMIRALTY Vector Chart Service

for the period to 28/02/2027

Supplied by: Tuna Gemi Ikmal San. Tic. Ltd. Sti

AVCS comprises only Electronic Navigational Charts (ENCs), each of which conforms to the definition of a nautical chart set out in SOLAS Chapter V Regulation 2.2. AVCS updates are provided weekly during the licence period.

AVCS is issued by the United Kingdom Hydrographic Office (UKHO). The UKHO is a government agency authorised to issue nautical charts and publications that conform to SOLAS Chapter V Regulation 2.2. The UKHO is an authorised provider of ENC services, including AVCS, which are distributed by a worldwide network of authorised ADMIRALTY Chart Agents (as listed in NP131 and at www.admiralty.co.uk/howtobuy).

AVCS includes access to the ADMIRALTY Information Overlay (AIO), which provides ADMIRALTY Temporary & Preliminary Notices to Mariners (T&P NMs) and ENC Preliminary Notices to Mariners (EP NMs) in a form that can be displayed as an overlay on ENCs in ECDIS. EP NMs highlight potentially navigationally significant differences between ENCs and ADMIRALTY paper charts.

AIO is included on AVCS licenses as an option – if it is installed the ECDIS will be loaded with a cell called GB800001.
